

Martin G. Hicks

Martin G. Hicks is a member of the board of management of the Beilstein-Institut. He received an honours degree in chemistry from Keele University in 1979. There, he also obtained his PhD in 1983 studying synthetic approaches to pyridotropones under the supervision of Gurnos Jones. He then went to the University of Wuppertal as a postdoctoral fellow, where he carried out research with Walter Thiel on semi-empirical quantum chemical methods. In 1985, Martin joined the computer department of the Beilstein-Institut where he worked on the Beilstein Database project. His subsequent activities involved the development of cheminformatics tools in the areas of substructure searching and reaction databases, and products such as Current Facts and CrossFire. After brief sojourns as the managing director of the Beilstein Verlagsgesellschaft in 1997 and subsequently the Beilstein GmbH from 1998 - 2000, he returned home to the Beilstein-Institut as head of the funding department in 2000. His interests and responsibilities range from organizing the Beilstein Bozen Workshops with the aim of furthering interdisciplinary communication between chemistry and neighbouring scientific areas to the publication of the Beilstein Journal of Organic Chemistry.

Beilstein-Institut

The Beilstein-Institut zur Förderung der Chemischen Wissenschaften (Beilstein Institute for the Advancement of Chemical Sciences) is an independent non-profit foundation whose mission is the advancement of the chemical sciences through information and communication.
